

# CHERAN'S CROWN

## 6 Station Auto Fusing Machine

### TECHNICAL SPECIFICATION

Model	CCAF 1620
Platen size	16'x20'
Heater	3kw/13Amps/bed
Temperature	220 Degree celcius
Air pressure	0-8bar
Air consumptions	2.2Cfm/Minute at 8bar
Number of Heater bed	2
No. of bottom bed	6
Speed	2sec approx from one Pallet to another

### FEATURES

- Plc controller for precise temperature & timer.
- Hmi for easy interaction with the machine.
- Servo drive for better positioning control
- Double heater bed to fuse two jobs at a time for better productivity.
- Fast continuous production.
- Normal , semi auto , full auto modes for easy operation.
- Two station individual operating system also available.
- Suitable for sublimation, fusing and children's garment.
- Robust constructions.
- Real time monitoring with shift wise & batch wise production data.
- Pre settings for batch quantity can be loaded immediately for production.
- Safety frame provided to protect operators.
- Reduces labour cost and electricity considerably.
- Automatic double stroke operation and production monitoring.
- Easy handling and maintenance.
- Automatic service intimation system available.
- Provision for problem display in case of any failure in machine.
