

# CHERAN'S FALCON

## 6 Station Auto Fusing Machine

### TECHNICAL SPECIFICATION

MODEL	CFAF0606
PLATEN SIZE	6' X 6"
HEATER	0.7KW/3 AMPS/BED
TEMPERATURE	220 C
AIR PRESSURE	0-8 BAR
AIR CONSUMPTION	0.72 CFM/ MINUTE AT 8 BAR
NUMBER OF HEATER BED	2
NO OF BOTTOM BED	6
SPEED	1 SEC APPROX FROM ONE PALLET TO ANOTHER

### FEATURES

- HMI for easy interaction with the machine
- PLC controller for precise temperature & timing
- Servo drive for better positioning control
- Double heater bed to fuse two jobs at a time for better productivity
- Fast continuous production
- Normal , semi auto & full auto modes for easy operation
- Two station individual operating system also available
- Suitable for wash care label , sublimation & fusing.
- Robust constructions.
- Real time monitoring with shift wise & batch wise production data
- Pre settings for batch quantity can be loaded immediately for production
- Safety frame provided to protect operators
- Reduces labor cost & electricity considerably
- Automatic double stroke operation & production monitoring
- Easy handling & maintenance
- Automatic service intimation system available
- Provision for problem display in case of any failure in machine
- Elegant design
