

VIVID ZEBRA HARDNER

Hardner for chemically curable photo emulsions

Product Usage

Zebra Hardner is an acidic aqueous solution for the chemical hardening of photoemulsions. It can easily be distributed using a brush and forms an evenly spread film which enable of homogenous curing results. No residue remains in open area after evaporation of hardener.

Application

Apply Zebra hardner onto both sides of the copied and dried stencil with the screen in horizontal position. Allow the hardener to react for approx 20 to 35 minutes at room temperature then harden for either 1 hour at 60°C or 24 hours at room temperature above 20°C.

Advise - when using on nylon meshes reduce Zebra cure with water in a ratio of 1:2 to 1:3

colour

Pink and Blue

Health hazards / Environmental protection

Zebra hardner contains acid. Wear safety goggles and gloves. Avoid splashes and spray mists. In case of contact with eyes and skin, rinse with plenty of water.

Storage

1 year at room temperature and tightly closed container
